UNDER THE GUIDANCE OF

Mrs   Y. Sneha

Assistant Professor

That sounds like a fun project! Here's a step-by-step guide to help you develop your travel blog website and manage it with Git:

Step 1: Set Up Your Project

1. **Create your project folder**:

2. mkdir travel-blog

3. cd travel-blog

4. **Create your HTML and CSS files**:

5. touch blog.html styles.css

Step 2: Develop Your Travel Blog Website

1. **HTML (blog.html)**:

HTML

```
<!DOCTYPE html>

<html lang="en">

<head>

  <meta charset="UTF-8">

  <meta name="viewport" content="width=device-width, initial-scale=1.0">

  <title>Travel Blog</title>

  <link rel="stylesheet" href="styles.css">

</head>

<body>

  <header>

    <h1>My Travel Blog</h1>

    <nav>

      <ul>

        <li><a href="#post1">Post 1</a></li>

        <li><a href="#post2">Post 2</a></li>

      </ul>

    </nav>

  </header>

  <main>
```

```html
    <section id="post1">

      <h2>Post 1 Title</h2>

      <img src="image1.jpg" alt="Image 1">

      <p>Content for the first post...</p>

    </section>

    <section id="post2">

      <h2>Post 2 Title</h2>

      <img src="image2.jpg" alt="Image 2">

      <p>Content for the second post...</p>

    </section>

  </main>

  <footer>

    <p>&copy; 2024 My Travel Blog</p>

  </footer>

</body>

</html>
```

2. **CSS (styles.css)**:

CSS

```css
body {

  font-family: Arial, sans-serif;

  margin: 0;

  padding: 0;

  background-color: #f4f4f4;

}

header {

  background-color: #333;

  color: #fff;

  padding: 1rem;

  text-align: center;

}
```

```css
nav ul {
    list-style: none;
    padding: 0;
}
nav ul li {
    display: inline;
    margin: 0 1rem;
}
nav ul li a {
    color: #fff;
    text-decoration: none;
}
main {
    padding: 2rem;
}
section {
    margin-bottom: 2rem;
}
section img {
    max-width: 100%;
    height: auto;
}
footer {
    background-color: #333;
    color: #fff;
    text-align: center;
    padding: 1rem;
    position: fixed;
    width: 100%;
    bottom: 0;
}
```

Step 3: Initialize Git and Manage Your Content

1. **Initialize a Git repository**:

2. git int

3. **Track your files**:

4. git add blog.html styles.css

5. **Commit your changes**:

6. git commit -m "Design travel blog website"

Additional Tips

- **Use GitHub** to host your repository and collaborate with others.

- **Add more features** like a contact form, interactive maps, or a comment section using JavaScript.
